Hi Joe,

Thanks for the O&M Plan. For the LDAR information, still going back to 1.1.2016 (unless otherwise mentioned below) I can pare it down to:

- 60.486a(c), which is information about leaks that have occurred what you've done after that.
- 60.486a(e)(4)(iii), which are the readings you get when you do the LDAR checks. If you have this electronically, let's go back to 1.1.2016. if it's all just hard copy, just the last 4 quarters.
- 60.486a(e)(7), which are the weekly pump checks.
- 60.486a(e)(8), which are the calibration checks.

Let me know if this works for you. I don't think this info should be that high volume, but if I'm missing something, let me know and we can go from there.

Thanks,

Greg

Hi Greg-

The complete O&M Plan for the flare is attached. To best satisfy your request without including a lot of superfluous information, can you provide further specifics on the LDAR information you are requesting, including the time period of inspection records?

Kind regards,

**Joe Winch**

Hi Joe,

The O&M Plan for your flare you sent only had the cover page. Could I get the whole plan? Also could I get the logs of LDAR information required by 40 CFR § 60.486a(c) through (j)? It's basically the LDAR "log book" for the plant. You don't need to resend information you may have already given me, although I'm just guessing it may be easiest for you to just copy the whole "book" and send it.

Let me know if you have any questions.

Thanks,

Greg

**Subject:** Didion response to Inspection follow up questions

Hi Greg-

Please see attached the first of two e-mails in response to your follow up questions to the June 28, 2018 inspection at our Cambria facilities. It is necessary to break up the response into two e-mails due to file size limitations. The second e-mail will soon follow. Please contact me with any questions, comments or concerns.

Kind regards,

## Joe Winch, PE

Hi Greg-

I left you a voice mail earlier this afternoon. There have been issues this entire week on the information systems side, and I have been unable to generate any electronic data to complete our response to your information request. Would it be acceptable to get a 7-day extension, to Friday August 17, by which time we hope to have these technical issues resolved?

Kind regards,

## Joe Winch, PE

Hi Joe,

Per your voice mail, August 10<sup>th</sup> sounds good to get this information.

Thanks,

Greg

Hi Joe,

I've attached a sheet with several follow up questions to my inspection.

Why don't you give me a call to discuss once you've had a chance to look them over?

Thanks,

Greg

Hi Greg-

This is in response to the question you presented during the inspection a couple of weeks ago regarding the instrumentation used during the LDAR inspections.

Kind regards,

**Joe Winch**
